

Free iPod Shuffles!

Put Some COLOR On!

With temperatures rising and summer just around the corner, what could be better than lying on a beach, relaxing, listening to the sound of waves crashing on the sand?

Listening to your music on a FREE iPod Shuffle of course!

In five brilliant colours the 1GB iPod Shuffle lets you wear up to 240 songs on your sleeve, or your lapel, or your belt...

...and whilst you're lying on the beach relaxing, listening to your music, we'll make sure your Web site and e-mail services are fully operational.

Starting the 1st of May, Net Energy Internet is teaming up with the new Apple Store in Exeter to give customers and resellers a free iPod Shuffle with every new web hosting plan purchased in May 2007!

Statistics Upgrade Completed

Following our January Energise article, we are pleased to report that the upgrade of customer website statistics was completed in the last week of of March 2007.

As part of the upgrade, all customers on our NT hosting and Windows 2000 hosting plans now have access to the same great statistics features as customers using our Windows 2003 hosting plans.

Key features included with the upgrade are the ability to track more file types and more page extensions.

All customers now also have the facility to e-mail statistics reports on a weekly or monthly basis.

If you would like to check who's visited your website, simply log into your statistics reports, either using your personalised domain name statistics address (<http://statistics.your-domain-name>"), or by using the generic statistics address <http://statistics.netenergy.net>.

If you don't have a copy of your statistics login details, please contact support@netenergy.net for assistance.

▣ Server Upgrades

Continuing the theme of improving our services, we are pleased to report on hardware upgrades, network upgrades and new features added to all customer hosting plans this month.

In all of our Windows 2003 Web servers, and e-mail servers, the memory has been doubled to ensure customer websites and e-mail services remain at peak performance.

We have also migrated all of our APC Uninterruptible Power Supplies (UPS) to network managed, enabling us to better monitor both the health and availability of all of the UPS that make up our hosting infrastructure.

▣ Hosting Upgrades

As well as improving our service from a hardware aspect, we are also pleased to report that our hosting plans have also been upgraded and now include more data transfer for no additional charge.

** At Net Energy Internet, web traffic is web traffic - we don't include e-mail traffic in your website data transfer quota.*

As with all of our previous upgrades, the new features apply to both new hosting plans as well as all existing customer hosting plans.

▣ Customer Notice - EU Domain Name Renewals

It's just over a year from the launch of the new .eu domain name extension and many Net Energy Internet customer .eu domain names are renewing in May.

The EU registry rules state that .eu domain names must be renewed on or by the renewal date to avoid incurring a penalty charge for late renewal.

If you would like to renew your .eu domain name, please ensure your payment reaches us before the renewal date so we can ensure your domain name is renewed on time and you avoid the penalty charge.

On a similar note, many .eu domain names were registered speculatively and as a result many of these domain names are not being renewed.

If you missed the opportunity to register your-name.eu or your-company.eu last year, you can check to see if it's now available using the no-obligation search tool on our website at www.netenergy.net.

And, at £12.95, our .eu domain name registration price is still one of the lowest around.

Thank you for reading the April issue of Energise.

If we can improve our service to you in any way, please get in touch by e-mailing energise@netenergy.net.

Thank you for choosing Net Energy Internet!
