## New! Support for .gov.uk and .ac.uk Domain Names

From the 18th of July, we are pleased to announce support for domain names with .gov.uk and .ac.uk extensions through a new membership with the .gov.uk/.ac.uk registry, UKERNA.

Similar to Nominet, who are responsible for all other .uk domain names, UKERNA are responsible for the administration and registration of domain names in the second level domains .gov.uk and .ac.uk.

Due to the nature of the extensions, there are various criteria and restrictions on eligibility for owning .gov.uk and .ac.uk domain names, used respectively by Government and Educational departments and entities.

Typical owners of .gov.uk domain names would include local council, borough and parish web sites, where the domain name would include the town or region name where appropriate.

Domain names with .ac.uk extensions would typically be registered by primary and secondary schools, colleges and universities and would also include the location as part of the domain name.

Since there are a number of detailed fields required to qualify for a .gov.uk or .ac.uk domain name, we will initially take applications for registrations by telephone or by e-mail.

### **Pricing and Features:**

UKERNA domain names are currently priced at £99.95 plus VAT per two years and include the following features:

- All registry fees for the registration period
- Unlimited e-mail addresses forwarding to a single destination
- Banner-free (no adverts) Web forwarding (masked, unmasked or IP based)
- Parking page indicating that your domain name is registered
- Unlimited QuickDial dial-up accounts
- No hidden charges or release fees
- Telephone, e-mail and online support

## AVAS Statistics - June 2005

Our Anti-Virus/Anti-Spam service, known as AVAS, is used by many of our customers to scan their e-mails for viruses.

As well as virus scanning through two, independent scanners, AVAS also analyses e-mails using five levels of spam detection to assess the probability that an e-mail contains spam content.

If you would like to add AVAS to your e-mail services, please contact [sales@netenergy.net](mailto:sales@netenergy.net) or alternatively please telephone 0870 243 0830.

## AVAS - Virus Statistics - June 2005

Viruses Detected During May:	6,873 from 1,146,016 e-mails
Worst Day:	15/06/2005 with 5.57% viruses
Best Day:	11/06/2005 with 1.32% viruses

## Top 5 Viruses

Win32:Netsky-P [Wrm]	2760
